**Pacific Northwest: WA, OR, ID, AK****1. Position: Fleet Maintenance Supervisor**

**Location:** Southern WA

**Description:** Responsible for supervising maintenance shop with 15 direct reports. Responsibilities include supervising a technician (mechanic) team responsible for preventive maintenance/repair of a fleet and machinery that supports the facility. Will provide direction to technicians to ensure that all repairs/maintenance to equipment (diesel and alternate fuel, containers and other heavy duty equipment) are performed in compliance with Company safety and compliance standards. Will also be responsible for planning and scheduling repair work for the work group to ensure that all work is done in a safe and timely manner, reducing lost productivity. Systems are Caterpillar, John Deere, and Volvo Fleet Equipment.

**Company Type:** Waste Management

**Requirements:** Experienced leader (E6 and above) with a technical MOS/rate and maintenance background. Vehicle/fleet maintenance experience a strong plus. Aviation maintenance also a fit.

**Compensation:** \$60-76Kbase

**Shift:** 1st shift, 13 hours, rotation: 3 days ON /4 days OFF; 6 days ON / 6 days OFF

## **West Coast: CA, HI**

### **1. Position: Field Service Engineer**

**Location:** Fullerton, CA

**Description:** Will work on high-powered electronic equipment aboard ships and in other commercial facilities. Will be required to perform emergency and scheduled maintenance and assist in the removal and installation of customer equipment. This includes analog circuitry, digital circuitry and appropriate mechanical adjustments. May be required to troubleshoot equipment down to component board level.

**Company Type:** Power Conversion and Distribution Systems

**Requirements:** Navy Nuke EM or Nuke ET. Must have experience with troubleshooting and repairing power generating and distribution systems. Must be able to read and interpret schematics, wiring diagrams and installation drawings.

**Compensation:** \$62-93K/yr

**Travel:** 35%

### **2. Position: Instrumentation Technician**

**Location:** Southern California

**Description:** Maintains installs and develop plant instrumentation to include all types of process control and measurement devices including electrical, electronic, pneumatic, hydraulic and mechanical devices. Troubleshoot, diagnose and repair instruments and systems to include final control devices (valves, pistons, etc.). Answer calls, perform preventative maintenance, and determine preventive maintenance and calibration schedules. Perform efficiency tests to determine problems dealing with areas such as fuel, water, time, quality, etc.

**Company Type:** Steel Producer

**Requirements:** Experience in Industrial instrumentation and combustion fields (preferably six years). Possess thorough understanding of Instruments and Process Control Systems.

**Compensation:** \$32-36/hr plus OT

### **3. Position: Electrician**

**Location:** Southern California

**Description:** Will install, maintain and repairs all electrical and electronic apparatus and equipment. Inspects and repairs electrical equipment and apparatus (both AC & DC). Checks electrical circuits, motors, wiring, transformers, crane electrical mechanisms, relays, lighting systems, magnets, magnet cables, motor drives, electrical testing devices, and other electrical equipment. Consults drawings and specifications as needed to assess and repair. Performs electrical, electronic and computer troubleshooting on equipment such as X-rays, lasers, shape control systems, edge and centering steering systems, electronic welders, hydraulic electronic servo systems, DC motor controllers, AC variable frequency controllers, radio controlled cranes and PLC controllers.

**Company Type:** Steel Producer

**Requirements:** Experience electrician from the military. Navy Nuke Ems preferred.

**Compensation:** \$32-36/hr

**Shift:** Rotating

#### 4. Position: Operations Supervisor

**Location:** Santa Fe Springs, CA

**Description:** Responsible for ensuring the successful completion of daily operations and maintenance activities for the local service facility. This includes leading and managing technicians, coordinating the preparation and repair of Aggreko equipment, coordinating the successful operations of jobs and events, and working with relevant groups, functions, and individuals to ensure efficient and profitable operations of the service facility. Equipment includes but is not limited to: generators, diesel engines, electrical distribution equipment, temperature control equipment and/or oil -free air compressors.

**Company Type:** Portable Power Generation

**Requirements:** Experienced leader (E6 and above) with a technical (mechanical) MOS/rate. Must have led up to 20 people. Experience with generators/HVAC a plus. Degree a plus.

**Compensation:** \$68-78K + 20% targeted bonus

#### 5. Position: Field Service Engineer

**Location:** Oakland/Bay Area, CA

**Description:** Will be accountable for the timeliness and quality of site inspections, installation, programming, repair and preventative maintenance of company produced medical device sterilization products within assigned territory. You will work from your home, but need be based in or around Oakland. Territory will primarily be the Bay Area up to Sacramento and as far west as Reno, NV.

**Company Type:** Sterilization Equipment

**Requirements:** Good electro-mechanical maintenance/troubleshooting skills. Navy FCs would be a good fit.

**Compensation:** \$65K - \$70K plus OT, \$800 monthly car allowance, gas card, phone, and laptop.

#### **6. Position: Field Service Technician**

**Location:** San Carlos, CA

**Description:** Will perform service on industrial water purification equipment that includes ion-exchange resin vessels, reverse osmosis units, filters, pumps, pressure regulators, and Laboratory Water Units.

**Company Type:** Industrial Water Treatment Systems

**Requirements:** Good mechanical/electro-mechanical skills with the ability to read electrical schematics.

**Compensation:** \$25-27/hr + OT

#### **7. Position: Maintenance Electrician**

**Location:** Willows, CA

**Description:** Perform maintenance and repair work that is essential to the safe and efficient operation of the plant. Read, interpret, and follow simple blueprints, diagrams and sketches, making all measurements and calculations necessary to complete job.

**Company Type:** Insulation Materials

**Requirements:** Good electrical maintenance experience. Navy Ems ideal.

**Compensation:** \$28.45/hr + OT

**Rocky Mountains: MT, WY, UT, CO, ND, SD**

**No positions available at this time**

## **Great Plains: NE, KS, IA, MO**

### **1. Position: Field Service Technician**

**Location:** Omaha, NE

**Description:** Responsible for providing maintenance service to cranes, truck-mounted forklifts, and other container moving equipment at customer locations.

**Company Type:** Material Handling Equipment

**Requirements:** Good mechanical maintenance experience (vehicle, shipboard or aviation)

**Compensation:** \$20-25/hr + OT

## **Midwest: MN, WI, IL, IN, OH, MI**

### **1. Position: Training Specialist**

**Location:** Chicago, IL

**Description:** Prepare and deliver learning solutions in both classroom and electronic environments assisting internal employees and external customers to achieve specific learning objectives. Ensure all contents areas are technically accurate and achieve training purpose. Review all assigned training materials and designs program improvements on a continuous basis.

**Company Type:** Building Automaton/Environmental Systems Controls Requirements: Experienced leader (E6 and above) with a technical rate/MOS and formal classroom instruction experience. Degree preferred. Master Training Specialist ideal.

**Compensation:** 70-75K

**Travel:** Up to 50-80% travel. Trips go from Monday-Friday, 3-5 nights on the road (come home for the weekends)

### **2. Position: Reliability Engineer**

**Location:** Green Bay, WI

**Description:** Provide reliability-engineered solutions to improve overall equipment effectiveness in a converting plant. Enhance equipment reliability through implementing TPM concepts. Oversee the preparation, planning, scheduling, coordination and execution of maintenance and equipment-reliability activities. Work with cross-functional equipment-improvement teams to assess equipment performance, countermeasure problems, and identify reliability activities.

**Company Type:** Paper Coating Manufacturing

**Requirements:** Experienced leader (E6 and above) with a technical MOS/rate who has done hands-on reliability/process improvement engineering project management work. Must be able to start by Jan 2016.

**Compensation:** \$75-80K base salary

### **3. Position: Maintenance Mechanic**

**Location:** West Chicago, IL

**Description:** Working on hydraulics and pneumatics will perform installation/trouble-shooting of industrial manufacturing equipment.

**Company Type:** Plastics

**Requirements:** Good hydraulic and pneumatic maintenance experience.

**Compensation:** \$22/hr + great benefits package

**Shift:** 2nd or 3rd

#### **4. Position: Production Supervisor**

**Location:** Cleveland, OH

**Description:** Directly supervises all Production Associates on the respective shift in the Processing and Packaging departments. **Compensation:** \$52K - 55K depending on experience + shift differential of 4K and up to 15% bonus potential

**Shift:** Night shift

#### **4. Position: Maintenance Supervisor**

**Location:** Western, OK

**Description:** Supervise and coordinate activities of maintenance employees to ensure proper machinery and equipment maintenance and repair.

**Company Type:** Meat (Pork) Processing

**Requirements:** Experienced leader (E6 and above) with a technical MOS/rate. 4-year degree preferred.

**Compensation:** \$55K+ base salary, plus \$4K shift differential plus 15% targeted bonus

**Shift:** Night shift

#### **5. Position: Production Supervisor**

**Location:** Western, OK

**Description:** Provide day to day leadership and management for all production employees ensuring all production outputs and quality specifications are met. Responsible for employee performance and retention.

**Company Type:** Meat (Pork) Processing

**Requirements:** Experienced leader (E6 and above). 2-year degree or better preferred.

**Compensation:** \$53K +, plus \$4K shift differential and up to 15% bonus potential

**Shift:** Nightshift

#### **6. Position: Field Service Technician**

**Location:** Dallas, San Antonio and Houston, TX

**Description:** Responsible for providing maintenance service to cranes, truck-mounted forklifts, and other container moving equipment at customer locations.

**Company Type:** Material Handling Equipment

**Requirements:** Good mechanical maintenance experience (vehicle, shipboard or aviation)

**Compensation:** \$20-25/hr + OT

## **7. Position: Field Service Technician**

**Location:** San Antonio, TX

**Description:** Will work out of home and will work with hospital/medical facilities as well as pharmaceutical/mechanical device companies that have purchased equipment and supplies from the company. Along with maintaining equipment, a major part of the job is establishing good customer relations with the client. You will be the primary contact with the client and at times it will be necessary to diffuse a negative situation (i.e., when a critical piece of equipment fails and the operation can't take place). Other times, your communication skills and relationship with the client can result in new equipment being purchased or increased business in other areas.

**Company Type:** Sterilization Equipment

**Requirements:** Good electro-mechanical skills. Local (able to drive in for an interview).

**Compensation:** \$45-55K + car/travel reimbursement

**Shift:** Monday- Friday Days. 8am-5pm w/ Overtime as needed. Saturday or Sunday possible if Customers' needs are urgent.

**Travel:** Minimal overnights required.

## **8. Position: Field Service Technician**

**Location:** Oklahoma City, OK

**Description:** Responsible for providing maintenance service to cranes, truck-mounted forklifts, and other container moving equipment at customer locations.

**Company Type:** Material Handling Equipment

**Requirements:** Good mechanical maintenance experience (vehicle, shipboard or aviation)

**Compensation:** \$20-25/hr + OT

## **Southeast: AR, KY, TN, MS, LA, AL, NC, SC, GA, FL**

### **1. Position: Maintenance Planner/Scheduler (E&I Department)**

**Location:** Macon, GA

**Description:** Will provide for the safe, reliable, and efficient operation of E&I Department by managing work force productivity and quality. Will eliminate potential delays and obstacles through proper planning and coordination of equipment availability, labor estimation, job scoping, material identification and procurement. Will work closely with other maintenance employees to plan and schedule all electrical maintenance work and will maintain liaison and coordination between operations and E & I organizations. Will maintain appropriate records and files to permit meaningful analysis and reporting of results of work done.

**Company Type:** Packaging

**Requirements:** Experienced leader (E6 and above) with a strong electrical background.

**Compensation:** \$65-73K base

### **2. Position: Production Supervisor**

**Location:** Memphis, TN

**Description:** Lead and manage a team of 25 production workers ensuring goals are met safely and efficiently.

**Company Type:** Confections

**Requirements:** Experienced leader (E7 and above) with a technical/engineering rate/MOS and a 4-year degree.

**Compensation:** \$70-75K

**Shift:** 2nd and 3rd shift positions available

### **3. Position: Shop Floor Leader**

**Location:** Memphis, TN

**Description:** Accountable to help facilitate the successful management of the company fleet maintenance shop. All actions will be in support of increasing line of business satisfaction, lowering the cost of repairs, and increasing equipment availability. This includes effectively working with the Shop Manager, managing the shop in his/her absence, and training to become a Shop Manager.

**Company Type:** Transportation

**Requirements:** Experienced leader (E5 and above) with maintenance management experience. Vehicle maintenance experience a plus.

**Compensation:** \$36-58KDOE

**Shift:** 2nd shift

#### **4. Position: Field Service Technician**

**Location:** Knoxville, TN; Riviera Beach, FL; Pensacola, FL; Lafayette, LA; Birmingham, AL

**Description:** Responsible for providing maintenance service to cranes, truck-mounted forklifts, and other container moving equipment at customer locations.

**Company Type:** Material Handling Equipment

**Requirements:** Good mechanical maintenance experience (vehicle, shipboard or aviation)

**Compensation:** \$20-25/hr + OT

#### **5. Position: Training& Development Specialist**

**Location:** Bowling Green, KY

**Description:** Responsible for partnering with Training manager and business leaders to develop and deliver appropriate learning solutions, formal and informal, to build the capability of associates to perform their job tasks.

**Company Type:** Detergent

**Requirements:** Experience informal training and classroom instruction/curriculum development. Navy Master Training Specialist would be a good fit.

**Compensation:** \$45-55K

#### **6. Position: Electro-mechanical Maintenance Technician**

**Location:** Atlanta, GA

**Description:** Support the installation, optimization and on-going maintenance of contact lens manufacturing lines. Troubleshoot, repair and perform preventative maintenance for all production equipment including technical problems in mechanical, pneumatic, hydraulic, and electrical and control systems. Assist with improvements to the maintenance systems (preventative, corrective,

predictive and spare parts). Assist with technical projects for process upgrades and improvements. Assist with revising or writing SOP's. Deliver training material to other Maintenance Technicians/Electro-mechanics for equipment, maintenance and troubleshooting.

**Company Type:** Contact Lens Manufacturer

**Requirements:** Good mechanical, electro-mechanical or electronic maintenance experience.

**Compensation:** \$20-24/hr + OT and shift differential

**Shift:** 12hr shifts (3 days 1 week and 4days the next week). Must be open to first and second shift.

## **Mid-Atlantic: PA, NJ, DE, MD, VA, W.VA, D.C.**

### **1. Position: Warehouse Supervisor**

**Location:** Baltimore, MD

**Description:** Leading a team of 15-25 union employees, will ensure on-time, Accurate and efficient delivery of merchandise from the Distribution Center to the stores. **Company Type:** Rain conveyance systems and products

**Requirements:** Experienced leader (E6 and above).

**Compensation:** 55K +

**Shift:** 1st shift

### **3. Position: Maintenance Technician**

**Location:** PA, MD, NJ

**Description:** Responsible for traveling to various plant sites and performing all general mechanical maintenance on power plant equipment.

**Company Type:** Power Generation

**Requirements:** Equivalent of 18 months of experience or technical training around Power Plant equipment or other mechanical maintenance technology (aircraft, shipboard, etc.). No degree required, but an Associate's in Power Plant Technology, Engineering Technology or Electronics would be a big plus. Must be able to pass the MASS test. Welding experience is a plus.

**Compensation:** \$25-30/hr + OT

**Shift:** Rotating

**Travel:** 50%

## **Northeast: ME, NH, VT, NY, MA, RI, CT**

### **1. Position: Maintenance Technician**

**Location:** MA and NY

**Description:** Responsible for traveling to various plant sites and performing all general mechanical maintenance on power plant equipment.

**Company Type:** Power Generation

**Requirements:** Equivalent of 18 months of experience or technical training around Power Plant equipment or other mechanical maintenance technology (aircraft, shipboard, etc.). No degree required but an Associate's in Power Plant Technology, Engineering Technology or Electronics would be a big plus. Must be able to pass the MASS test. Welding experience is a plus.

**Compensation:** \$25-30/hr + OT

**Shift:** Rotating

**Travel:** 50%

### **2. Position: Maintenance Mechanic**

**Location:** Boston, MA

**Description:** Responsible for performing maintenance on general plant equipment. Emphasis is on troubleshooting, but responsibilities may include: light electrical and welding jobs with little direction. Will perform all assigned tasks to maintain plant equipment and facility in reliable condition. Will troubleshoot and correct production line breakdowns quickly, efficiently and safely.

**Company Type:** Dry mix and powdered food products

**Requirements:** Good mechanical/electro-mechanical maintenance experience. Electrical or welding experience a plus.

**Compensation:** \$22-25/hr + OT

**Shift:** 1st shift; 6:30 AM - 5:00 PM (4 x 10hour days; occasional 5th and/or 6th day, if job requires)

### **3. Position: Field Service Technician**

**Location:** Lowell, MA

**Description:** Will be responsible for servicing and troubleshooting water treatment equipment (Reverse Osmosis and Lab Equipment), exchanging service deionization tanks, and completing necessary paperwork. Responsibilities include electrical and mechanical testing, troubleshooting and repairs, system cleaning, disinfection, calibrations and other required services.

**Company Type:** Sterilization Equipment

**Requirements:** Navy Nuke ELT or electro-mechanical candidate with water chemistry/treatment experience. Must have a combination of technical and customer service skills. Must also have a clean driving record.

**Compensation:** \$50K - \$55Kplus OT. They will provide you with a company vehicle, gas card, cellphone, and laptop.

**Shift:** This is a day-shift role but individual must be open to working varying hours based on client needs to include nights, weekends, and holidays.

#### 4. Position: Field Service Engineer

**Location:** Deer Park, NY

**Description:** Commission, calibrate and maintain vibration-measuring instruments and balancing machines. Plan and coordinate activities concerned with installing equipment, investigating and resolving customer reports of technical problems with equipment, and eliminating future operational or service difficulties.

**Company Type:** Balancing and diagnostics systems for rotating equipment

**Requirements:** Good electrical maintenance and trouble-shooting experience with mechanical aptitude. Must be proficient in DVM, O-Scope, PC (Windows, MS Word/Excel/PowerPoint), and instruments used in troubleshooting of electro schematics diagrams.

**Compensation:** \$20-\$30/hr + OT

**Travel:** 80% travel, sometimes internationally.
